To TFAC members,

The Solomons Charter Captains Association (SCCA) and our coalition members would appreciate your consideration of this proposal during your January 2015 TFAC meeting. SCCA is a group of 70+ Charter Captains currently licensed and operating within the Maryland Chesapeake Bay.

We have canvassed various stake holders bay wide, to include MCBA members, MWA members, Calvert Watermens Association (CWA) members, Upper, Mid and Lower Bay Charter Captains and other stake holder groups (i.e CCA MD) with our proposals, and have received positive feedback for our proposal. We are cognizant of the fact that there is not 100% agreement on this issue amongst stakeholder. However, we feel our proposal is well balanced and addresses each stakeholders concerns and meets the ASFMC's reduction criteria.

On behalf of the Solomons Charter Captains Association and our coalition partners we would like to request your support for option 5 from yesterdays SFAC meeting.

Option 5 was approved to be included in the amended list of options at yesterdays SFAC meeting by a member motion, 2nd and roll call vote.

Option 5 reads:

1 Fish total, (1) fish 28" - 36" or (1) fish 40" or 41" or larger (size to be determined after review of DNR data).

On behalf of the SCCA members we appreciate your consideration.

Capt. Wally Williams
SCCA President
